

Medications

Guidelines for medications distributed in schools are as follows:

1. The parent must sign a parental authorization and release form to have medication dispensed. Forms may be obtained from the school nurse.
2. Prescription drugs must be brought to school in a labeled container from the pharmacy and/or physician and taken to the nurse's office accompanied by a note with a count of the pills in the prescription bottle.
3. Over the counter drugs must be in the original container and not brought in a baggie with a note from a parent. Important information is provided on the box or bottle.
